Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-21 are presented for examination.

INFORMATION DISCLOSURE STATEMENT

2. The information disclosure statements filed on September 29, 2006 and November 2, 2006, complies with the provisions of MPEP § 609. They have been placed in the application file, and the information referred to therein has been considered as to the merits.

Specification

3. The applicant must provide the serial numbers for the related applications indicated on page 1 of the specification.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher et al. (Publication Number: US 2004/0044700 A1 filed August 28, 2002, hereinafter Fisher).

Art Unit: 2167

6. Regarding Claims 1, 8, 13, 14, and 18, Fisher teaches a method for improving the recovery time from a lost database in a vts automation system.

The method and associated system for improving the recovery time from a lost database in a vts automation system as taught or suggested by vts includes:

receiving one or more operations that are determined to be wasteful (paragraph 0035); detecting when wasteful operations are performed (paragraph 0035); recording a value that is spent on the wasteful operation (paragraph 0044); and storing the value (paragraph 0029), the value is used to quantify the impact of a performance in a database (paragraph 0044).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the method of Fisher to include a timestamp because a timestamp could provide a physical time for the recovery and improvement of data from the lost database.

7. Regarding Claims 2-7, 9-13, 15-17, and 18-21, the limitations of these claims have been noted in the rejections presented above. They are therefore rejected as set forth above.
